

# Custom INJECTION MOLDING

## Injection Molding

We provide a variety of single & two-shot injection molding solutions with a wide range of thermoplastic materials.

## Tool Design & Building

Our in-house engineering and tooling teams gives us the capabilities for complete tool design & building.

## Assembly

We supply a variety of light to medium Assembly & Secondary Operations to compliment our injection molding services.

## About The Company!

Alco Plastics specializes in custom injection molding and provides our customers with a variety of different molding solutions to suit each of their specific application needs. We manufacture automotive safety, A-class surface, functional, under-hood and fuel system components.

## Why Choose Us?

- ☒ Specialize in manufacturing tight tolerance, high precision parts.
- ☒ Complete in-house services allowing fast turn around during the development & manufacturing phases.
- ☒ Quality service, industry driven and customer focused
